

Do you

leak urine when you
laugh, cough, sneeze or workout?

Have you

noticed decreased arousal or
diminished orgasm during intercourse?

Is your

vaginal dryness causing discomfort?

Women experience vaginal
changes due to childbirth, age,
lifestyle or hormonal fluctuations.

These changes affect the
vaginal tissue decreasing sexual
function and causing urinary
incontinence.

The Viveve Treatment is a
nonsurgical one time treatment
that rebuilds the tissue of the
vagin canal.

THE VIVEVE DIFFERENCE...

We are committed to addressing
common issues that have a profound
impact on a woman's daily life.

VIVEVE

www.viveve.com

The Viveve System is indicated for the treatment of
vaginal laxity, sexual function or urinary incontinence in
more than 50 countries, and use in general surgery for
electrocoagulation and hemostasis in the United States.

“

For years now I have been experiencing issues with holding my bladder, and vaginal dryness. All these issues were super embarrassing for me. I hadn't realized there was a treatment for this until one of my friends told me about Viveve. I can safely say that this treatment works, and I really wish more women knew about it! I know that the issues I was facing are more common than most people think – and Viveve is the answer.”

The Viveve Treatment

Viveve is a nonsurgical radiofrequency treatment that rebuilds vaginal tissue. The treatment improves orgasm, lubrication and arousal and provides support to the urethra (bladder opening).

A small treatment tip is inserted just inside the vaginal opening and is rotated while it alternately cools the surface and heats the soft tissue beneath. This generates new collagen, providing structure and strength to decrease laxity and restore sensation.

Studies have shown sustained results at 12 months.

- » A single 30–45 minute session
- » Safe and comfortable
- » Clinically-proven
- » Respectable and discreet

Sexual Function—30 min treatment ■

SUI—45 min treatment ■

“

I read that Viveve can help with sexual sensation and incontinence. I can say that the staff answered my questions and were very friendly and professional, and the treatment was quick and pain-free. What I like best is that I only have to do it once. Other treatments I looked at were 3 or more. It has been a couple of months and I can say that I am so excited about my treatment. I even went to a trampoline park with my kids...with success! And the sensation part is amazing too! Highly recommend the Viveve treatment!
